A screenshot of a terminal window on an Ubuntu desktop. The terminal title is "jy@ubuntu:~". The user runs several commands to create a text file and search for specific patterns. The output shows the creation of a file named "textfile" containing various lines, and the use of grep to filter lines starting with '^n', lines ending with '.00', and lines containing 'wy'.

```
jy@ubuntu:~$ cat > textfile << EOF
> no, I study in njupt.
> this line ends with 00
> this line ends with.00
> I am 25 years old.
> He is 15.
> It is 16.00
> wy is the short of my name.
> EOF
jy@ubuntu:~$ grep '^n' textfile
no, I study in njupt.
jy@ubuntu:~$ grep '\.00$' textfile
this line ends with.00
It is 16.00
jy@ubuntu:~$ grep '5\..'
jy@ubuntu:~$ grep '^[wy]' textfile
wy is the short of my name.
jy@ubuntu:~$ grep '5\..'
